The Law Offices of Bilfield & Associates Adds Criminal Defense and Family Law Practices

Cleveland, OH (December 2017)--Bilfield & Associates continues its growth as a premier bodily injury and medical negligence law firm with expansion of its client legal services to include domestic and family law, felony and misdemeanor criminal defense.

Bilfield & Associates is expanding its areas of practice to further enhance its already multifaceted level of representation, with the of-counsel affiliation of Attorney Edward W. Rausch. Attorney Rausch has over forty-two (42) years' experience in the fields of domestic and family law matters, consisting of contested divorce, dissolution of marriage, custody, support, juvenile court, and criminal defense cases, including felonies and misdemeanors in Federal, State and Municipal courts. Mr. Rausch also represents individuals charged with serious traffic offenses such as Operating a Vehicle Impaired (OVI), Driving Under the Influence (DUI), and Driving Under Suspension (DUS) in State and Municipal courts.

"We are excited to add these new areas of representation for individuals who are in need of legal counsel," said managing partner, Murray D. Bilfield. "Our clients will always talk with an actual attorney when they call; not a paralegal or assistant like many other firms. Free telephone consultations are always provided by all the attorneys at Bilfield & Associates."

Victims of Sexual Misconduct: Why are Their Voices Not Heard?

The trial lawyers at Bilfield & Associates represent adults, teenagers, and children (female and male) who have been victimized by sexual misconduct.

In spite of recent revelations of sexual assault, abuse, and harassment perpetrated against women, men, and teenagers by prominent individuals in government, entertainment, and education, there are many more unreported cases where the victims of sexual assault, abuse, and harassment simply suffer in silence. The reasons are numerous, but is usually explained by one of the following:

- Perpetrated by an individual having control over the victim's employment, education, or sports participation
- Perceived lack of power on the part of the victim
- Fear that no one will believe them
- Fear of retribution and public/community condemnation and humiliation

In our next newsletter we will discuss what constitutes sexual misconduct and how the victims may seek compensation
